FINAL ROADMAP FOR PLACEMENT (JULY 1ST 2025) – (NOVEMBER 30TH 2025)

Great point, Ankit! For **product-based companies**, **aptitude**, **DBMS**, **OS**, and **Computer Networks (CN)** are **must-know** topics — especially for companies like Google, Atlassian, DevRev, Razorpay, Uber, and even Flipkart.

Let me now give you a **complete 6-month roadmap (June–November)** that covers:

✅ **Tech Subjects**

- DSA
- System Design
- Full-Stack Projects
- CS Core (DBMS, OS, CN)
- Aptitude & Reasoning
- Resume + Mock Interviews
- Behavioral + Communication

📅 **June – Foundation & DSA + CS Core Basics**

✅ **DSA (5 days/week)**

- Arrays, Strings, Hashing, Stack, Queue
- Daily: 2 Easy, 2 Medium, 1 Hard
- Sheet: Neetcode 150 + Striver

✅ **DBMS (2 days/week)**

- Topics: ER Model, Normalization, SQL, Indexing, Transactions
- Resources:
    - Love Babbar DBMS playlist
    - Operating system + DBMS notes from Gate Smashers

✅ **Operating System (1 day/week)**

- Topics: Process vs Thread, Scheduling, Deadlock, Memory
- Use: Gate Smashers or Jenny's OS series

✅ **Aptitude (30 min/day)**

FINAL ROADMAP FOR PLACEMENT (JULY 1ST 2025) – (NOVEMBER 30TH 2025)

- Ratio, Time & Work, Percentages, Averages, SI/CI
- Resource: IndiaBix + Pocket Aptitude app

✅ **Goal**:

- DSA 80+ questions
- DBMS & OS basics covered
- Aptitude: 3 topics clear

📅 **July – CS Core + System Design + Resume Building**

✅ **DSA (4 days/week)**

- Linked List, Trees, Graphs, Recursion

✅ **System Design (2 days/week)**

- Learn HLD: URL shortener, Load balancer, Instagram Feed
- Tool: Excalidraw for diagrams

✅ **Computer Networks (2 days/week)**

- OSI model, TCP/IP, HTTP, DNS, IP, Routing
- Tools: Gate Smashers / Computer Networking by Kurose

✅ **DBMS (1 day/week)**

- Transactions, Indexes, Query optimization, SQL joins

✅ **Resume**

- Finalize with metrics + links
- Add GitHub/LinkedIn/Portfolio

✅ **Goal**:

- 150+ DSA questions
- Resume ready
- OS, DBMS, CN covered once fully

📅 **August – Backend + Full-stack Project + Open Source**

✅ **Backend Dev Deep Dive**

FINAL ROADMAP FOR PLACEMENT (JULY 1ST 2025) – (NOVEMBER 30TH 2025)

- Node.js + Express.js + PostgreSQL + Redis + Auth
- Implement:
    - Rate limiter
    - Queues
    - Caching
    - Background jobs

✅ **Full Project**

- Example: Video Calling App, Job Scheduler, Scalable Chat App
- Include testing (Jest), Docker, GitHub CI/CD

✅ **Aptitude (daily)**

- Puzzle, Logical Reasoning, Number Series
- Tools: HackerRank, FacePrep

✅ **Goal**:

- 1 production-ready project
- Backend mastery
- Aptitude 60–70% covered

📅 **September – System Design Mastery + Interview Practice**

✅ **System Design**

- Practice 1 new design/week
    - WhatsApp
    - YouTube
    - Scalable Chat
    - Dropbox
    - Rate Limiter

✅ **Mock Interviews (2–3/week)**

- Use Pramp, peers, or Interviewing.io
- Include HR + Tech rounds

FINAL ROADMAP FOR PLACEMENT (JULY 1ST 2025) – (NOVEMBER 30TH 2025)

✅ **OS + CN Revision**

- Create 1-pager notes
- Practice from MCQs & past interview questions

✅ **Goal**:

- 4+ projects deployed
- OS + CN strong
- 4 system design problems revised
- 10 mocks done

📅 **October – Job Applications + CS Core Final Touch**

✅ **Job Applications**

- Apply off-campus (early)
- Focus: DevRev, Tekion, Rubrik, Uber, Atlassian, Groww

✅ **DBMS, CN, OS**

- Focus only on interview-style Qs now
- 1 revision sheet for each subject

✅ **Behavioral Interviews**

- Use STAR method
- Prepare 5 strong stories:
    - Project challenge
    - Team conflict
    - Learning curve
    - Time management
    - Failure & bounce back

✅ **Goal**:

- Apply to 30+ companies
- Final notes ready
- 10 behavioral Qs practiced

FINAL ROADMAP FOR PLACEMENT (JULY 1ST 2025) – (NOVEMBER 30TH 2025)

🗓️ **November – Final Revision + Heavy Mock Phase**

✅ **Final DSA Revision**

- Revise 200 Qs
- Focus: DP, Trees, Graphs, Sliding Window, Greedy

✅ **Mock Interviews**

- Daily mocks — DS + System Design + CS Core mix

✅ **Final Portfolio Polish**

- Add blogs on:
    - System design
    - Project case studies
    - Learning recap

✅ **Goal**:

- Ready for all rounds
- Final polished resume, GitHub, LinkedIn
- 90% companies' syllabus covered

🔥 **Bonus Weekly Plan (Hours/Week)**

Task	Hours/Week
DSA	12 hrs
Backend Dev	10 hrs
CS Core (OS/DBMS/CN)	6 hrs
Aptitude	3 hrs
System Design	5 hrs
Mocks + Resume	4 hrs

🚀 **Want This as a Notion/Google Sheet Template?**

FINAL ROADMAP FOR PLACEMENT (JULY 1ST 2025) – (NOVEMBER 30TH 2025)

I can make:

- ✅ Weekly Task Sheet
- ✅ Progress Tracker
- ✅ Checklist with links to video/docs
  Just say **"Make tracker"** and I'll build it instantly.

Ready to go beast mode? 💪

Why Freelancing Helps Your 50 LPA Dream:

1. **Real-World Projects = Gold in Interviews**
   Freelancing gives you complex, unscripted problems:
   - Multi-user auth
   - Billing logic
   - Admin dashboards
   - Database design
     These are **much more impressive** than clone projects.
2. **Strong Portfolio + Resume Points**
   - "Built a car rental system for a US-based client using Next.js, Node.js, and PostgreSQL, handling over 10,000 bookings/month."
   - Sounds way more powerful than "Made a project for learning purposes."
3. **Open Doors for Product Roles**
   Startups **love candidates** who've worked with real clients. It shows:
   - Communication skills
   - Business understanding
   - End-to-end ownership
4. **Boosts Confidence for Interviews**
   You'll be able to say:

"In one of my freelance projects, I solved a latency issue by optimizing API routes with Redis caching and queue-based processing."

⚠️ **How to Manage Both Without Burnout:**

FINAL ROADMAP FOR PLACEMENT (JULY 1ST 2025) – (NOVEMBER 30TH 2025)

🗓️ **Plan:**

- 1 client project/month — small to medium scale
- Work 2 hrs/day or 10 hrs/week on freelance
- Focus on **backend-heavy or scalable full-stack tasks**

👇 **Examples of Good Freelance Projects:**

- SaaS dashboard with Stripe billing
- E-commerce backend with cart, orders, coupons, email
- AI feature integration (e.g. OpenAI-powered writing tool)
- Booking system with time slots, role-based access, admin dashboard

---

🧠 **Final Verdict:**

- Yes → **Do freelancing**, but don't overcommit.
- Pick 1–2 good, **backend-focused, challenging projects**
- Make sure each freelance project improves your **GitHub + Resume + System Design knowledge**

If you want:
✅ Freelance-ready full-stack project ideas
✅ Where to find clients
✅ How to package your freelance work for interviews

Say "**give me freelance strategy**" — I'll tailor it for you.
